There are some people who can't drive, shouldn't drive, don't want to drive, aren't allowed to drive and/or can't afford to drive. That is why we need more trains! Connecting Portland and Orono with stops at Auburn, Lewiston, Waterville and Bangor with a train would be an excellent choice even for those of us with a personal vehicle. The popularity of the Downeaster has shown that trains would be a viable transportation alternative for passengers and would reduce the need for road maintenance and expansion. Please vote "yes" for LD 487. Thank you.
