

Velinda Elwell
Gorham
LD 1020

As a Gorham resident, I support LD1010 to repeal the MTA Construction of the Gorham Connector. Please stop this wasteful spending once and for all. The traffic issues could be fixed by adding 2 roundabouts, which would allow a consistent flow of traffic and widening 114 in several areas along the stretch which are less populated. They don't need to build a toll highway that dumps straight into the already bottle neck area of Gorham. Why waist anymore taxpayers \$\$\$ especially given the current circumstances in our country. Just find a way to improve the current routes. I am sure that exhorbanant amount of money they were planning on waisting on this project could be put to much better use.
