

Deborah Crump  
West Paris  
LD 1138

Dear Senator Nangles, Representative Crafts and members of the committee, my name is Deborah Crump, I live in West Paris and I support LD 1138, An Act to Reduce Pollution Associated with Transportation in Alignment with the State's Climate Action Plan. I think it is essential to have clean energy options for public transportation for several reasons: to decrease the use of fossil fuels, make transportation available for people who don't have cars or live in rural areas and to decrease traffic congestion. Transportation is one of the leading causes of pollution, so fewer gas-fueled vehicles makes the air we breathe healthier. I also encourage increasing safe bike lanes and walkways throughout the state. Thank you for your work on this important issue and supporting Maine's climate.
