LD 1138

Hello Esteemed Transportation Committee, This afternoon I write to plead that you please approve and move LD 1138 forward. I cannot think of one reason to delay working to have LD 1138 help to remove the costly pollution caused by the thousands or millions of gasoline vehicles and all gasoline engines. Millions\$\$ in human and animal illness, noise, air, and soil pollution, including negative impacts on native insects, birds, and amphibians. Walking may be the most important benefit for healthy living and we do not have wide and safe walkways between neighborhoods and importantly, Towns. Here in the midcoast are unused train rails which could be public transportation with bikeways alongside from at least Brunswick to Belfast. THANK YOU for working to try and save our ecosystems and working to improve living & working in Maine. PLEASE PASS LD 1138
