Increasing the number of plants for a caregiver will only help the state and the businesses that have been a part of this community. It will help damage the black market, help lower cost for patients, help with availability of products, helps keep the market strong by keeping the supply more steady. This would create more jobs for Maine and the cannabis industry as well as being in more taxes.

As for Id 353 this will also further the caregiver program by allowing us to have more opportunity. Small businesses need protection too we shouldn't be battling out of state corporations. They have done nothing to help this community and just want to come take our money and hard work out of state. On top of that having no prohibition law for dispensary collectives is not fair or just.

We have managed with out seed to sale tracking for years, why put it in now forcing us to Change SOP s and spend more
