I am in support of this bill , as a local caregiver this bill would allkw me to grow more plants which will help patient asscesibility and availability.

The supply chain was dangerously low last summer and when vacatiioners arrive this summer, supply is expected to get worse.

This bill also cost the state zero dollars again zero dollars to enact and it will create a new jobs within ,my small local business to handle the new workload, it will boost local supply sales and services(soil, fertilizer, lights, heat, ect)
