

Catherine Lewis
Medical Marijuana Caregivers of Maine Trade Association

Good morning. We support this bill to allow an increase in plant count and encourage the committee to allow an increase in square footage for those who don't grow by count. With the allowance of transfer of fleet from medical to adult use there has been a shortage. This would allow caregivers to cultivate enough supply and lessen the need to purchase from others. It also allows caregivers to offer their patients a greater variety of strains to meet their needs. Thank you.
