Monmouth

I am testifying in support of LD 421. This bill would DOUBLE the allowed plant count for medical caregivers from 30 mature to 60 mature and 60 immature to 120 immature plants. All of Maine's caregivers, processors, manufacturers, retailers and most importantly PATIENTS would benefit from easing restrictions on cultivation for caregivers. This is an important step for Maine's cannabis ecosystem away from stigmatization and unjust past criminalization of marijuana and towards increasing access to high quality cannabis and a more small-business-friendly system of commerce.
