PORTLAND

Good morning,

Im writing this morning in support of LD421-An Act To Increase The Number of Plants a Medical Marijuana Caregiver May Cultivate. I own and operate a small cannabis facility in Southern Maine and am finding it increasingly expensive to do business. With the current limits on plant count If I have any issues with my crops and find a decrease in yields, it leaves me with minimal revenue to operate my business. We are trying to grow as a company and become a profitable venture but this is restricted by the small amount of plants we can legally grow.

I believe if we increase the plant count and allow the plant canopy model to expand we could increase our crop yields, hire additional help and continue to expand our business.

Thank you for your consideration

Kind regards,

Ryan Henderson
