

Theodore Sirois
Saco

Although I agree with this act to ban expenditures by foreign entities to influence our referendum process, I will only support such a law if it includes out-of-state entities also. It is blatantly obvious proponents of this bill intend it to remove funding from legitimate foreign companies who do businesses in Maine from supporting the Clean Energy Corridor. Yet his bill allows funding by out of state fossil fuel energy producers intent on emitting more CO2 & other air pollutants for the sake of profit. I hope you can see the true intent of this bill and how it takes away from Maine's initiative to reduce CO2, provide jobs and a more robust energy grid.
