

Dear Veterans and Legal Affairs Committee,

My name is Eric McMaster. I live in Brunswick. I am the caregiver at Tru Blooms Wellness. I am writing in opposition to LD 882. My ethical decisions are inline with your position to place an administrative hold on any and all products that pose a public safety concerns or threats. However, I would like to see what might constitute a public safety concern. The language in the bill suggests there might have been a financial impact study used to create and suggest public safety concerns. Again, I support the concern for public safety and healthy hazards as with all industries but just like all industries there is a definition list. I can't seem to find that list.

Thank you for you work

Best Regards,
Eric McMaster
