

Wyatt Fowler
Maine caregivers

As a Young Mainer, born and raised in this state, growing up with farming traditions and being a passionate individual on cannabis. I really want to have a future in this wonderful community. But sadly , the state is favoriting out of state companies, giving all my friends, who worked and have worked for years to get us where we need to be in this state. **WHY FIX WHATS NOT BROKEN??** you will destroy so many , before you make it any better, trust me. I see it first hand and it makes the state look like absolute sell outs! Crazy Maine is community, we help each other eat! You're taking away out freedom, and passion. Please re think a lot of what you decide to do in this bill. Many people can survive with the current program we have now, changing how things are , will only make it worse.
