LD 948

I am a maine medical cannabis patient and also work for a caregiver in the industry. I urge you to vote in support of LD 948. This bill would help support the medical program by streamlining the process and ridding it of unnecessary burdens to the caregivers. Allowing a higher plant count and less burdensome license renewal process will give the medical market the access it needs to provide a growing number of patients the medicine that they require. Thank you for your time.
