

Cory Weaver
Topsham
LD 948

My Name Is Cory Weaver, I am a medical caregiver and I support LD948. The Changes in plant allowance would offer my business an opportunity to sensibly expand production and R&D. The current plant count structure is very limiting towards exploring new beneficial varieties. Our medical program participants deserve and should expect a large variety of available medical options so they can explore and determine what provides the best relief for them. Please pass LD948 and continue to demonstrate that we care about the people who live and who work in this great state and participate in this great program.

I am also in support of increasing renewal times to two years with LD1038
