I am a medical cannabis patient. I would like to see support for this legislation since I think it would be greatly beneficial for patients by removing the unnecessary burden of having to renew their certification every year. Most people like myself who are getting their medical cannabis certification are suffering from long term health issues that we are treating with this medicine. Most if not all patients continue to renew their certification every year since they continue to need to medicine to treat their symptoms. Passing this legislation would help patients have better access to the medicine they need while reducing the unnecessary clerical burdens that renewing every year puts on the patient. Thank you for hearing my testimony.
