LD 1431

I URGE you to vote OUGHT TO PASS on LD1431, An Act to Implement an Interstate Voter Registration Cross-check Program. Our current system in Maine doesn't work as is evident by the 106% of the CVAP as reported by the Secretary of State herself. We need absolute accuracy when dealing with our voter rolls. If we can securely do that by using, at the very least, an interstate cross-check program, why would we not want to do that?! Also, if the Secretary of State can securely obtain death records without breaking any privacy laws, why wouldn't we want that to happen. This streamlines the process to be more efficient and effective, as well as expeditious, within our existing technology. We need secure elections. There are too many bad players trying to contort our elections in their own favor. Lack of faith in the outcome is becoming too prevalent. Any mechanism, such as cross-checking, will be instrumental in bring back honest and believable election results. Please vote OUGHT TO PASS on LD1431 to help that to happen. Thank you!
