To Members of the Committee:

Nothing feels more important in a democracy than that voters can be heard on critically important issues related to elections. I urge the legislature to send the referendum that would affect absentee ballots to the voters on November 4. Due to my husband's health concerns, we both receive absentee ballots for each election, and very much want to continue to do so. We use a convenient drop box to submit our ballot, and cannot think there is any good purpose whatsoever served by reducing the box locations.

Thank you for your consideration.
