I am a citizen of Southern Maine. I do not understand why we're wasting our time and tax dollars to make voting harder for people in our state. There is no evidence to support these measures and as someone who actively has used absentee voting because of work and my commute not allowing me to be able to make it to polls for various elections and varying medical reasons, limiting my access to vote is an infringement of my constitutional rights and to those who otherwise would have no way to travel to vote or also face hardships due to age, active duty military members abroad, disability, transportation, and similarly to me, work related conflicts. Voting is a right in the United States and ensuring access to vote via absentee supports our rights.
