The Resolution of the voting age to 16 is crucial for the future of America. As a young person myself I understand the need for this resolution. Being 16 years of age in Maine means young people can get employed, drive cars, and make legal consent, but voting is excluded from what 16 year olds are capable of participating in. In order to be fairly represented in our community, that we are now a part of at 16, the voting age must be changed. Youth are the most vulnerable in this society but also have the most potential, we have worked for change before but we can now have the opportunity to really make an impact if we are given a legal voice.
