I'm writing in support of the bill that promotes a fair market for sun grown cannabis. Sun grown producers offer high-quality, sustainable products, and they deserve the same opportunities as indoor operations.

Growing outdoor/sun grown cannabis in the state of Maine is not an easy task due to the climate, severe weather variances and other environmental factors. Allowing the increased plant count for outdoor cultivators allows for sun grown cannabis producers to cultivate a number of plants to ensure a harvest that allows them to sustain their practices. Indoor cultivators have the opportunity to harvest several times a year depending on their cycles, while conventional sun grown cannabis only allows for one harvest.

This bill helps level the playing field while supporting environmentally responsible farming. It's a smart, forward-thinking step for the future of cannabis.

Thank you for considering it.
