LD 104

I'm testifying against the passing of this bill. It will be a disaster to the businesses, employees, patients and communities which depend on the industry. This is an industry ending bill. Medical growers have worked too hard and are the only honest ones left in the industry. Patients depend on us for RELIABLE and AFFORDABLE medication. These bills will take all of that away from the patients who really do still need this as a medication. The small time caregivers who produce some of the cleanest meds in the state will not be able to financially keep up with the rigorous testing and tracking. If you truly intend to give the patients the best possible access to medicine this is NOT the way to do it.
