LD 104

I'm testifying against the passing of this bill. It will be a disaster to the businesses, employees, patients and communities which depend on the industry. This is an industry ending bill. Many people depend on medical cannabis for many reasons and with what LD 104 entails it'll make it impossible for patients to have fresh medical cannabis and also will drive the price up to cultivate said medical cannabis. Many people will not be able to afford their medical cannabis and also many people will suffer with unemployment from businesses that will be forced to shut down due to the outrage price of said testing as well as the turn around and testing regulations that will come with LD 104. I do not think testing medical cannabis is a bad idea but I don't think LD 104 will bring exactly what our government and some of our citizens think will happen, and would be revised be really thought out before passing said legislation.
