As a medical cannabis patient, I'm concerned about the proposed regulations—including more testing, track-and-trace requirements, and potency limits—that would harm local jobs in small cannabis farms and production facilities. These changes will increase costs, put local jobs at risk, and give larger, out-of-state corporations a competitive edge. We've already seen what happens when local manufacturing is pushed out—product quality drops, and our communities lose meaningful employment opportunities.

The current system is effective and supports local businesses and workers. Please reject these proposals and protect the jobs and economic stability of our community. NOT FOR LD104 or LD1847:

General Example:

I'm writing to express my support for the cannabis-related bills currently under review. I believe these kinds of updates are a step in the right direction for our state and reflect the evolving needs of both patients and adult-use consumers.

Whether it's improving access, streamlining rules, or helping small businesses compete fairly, responsible policy changes can make a big difference. I appreciate seeing progress that balances safety, economic opportunity, and personal freedom. Thank you for continuing to move cannabis policy forward in a thoughtful and inclusive way.

LD1897 Example:

I'm writing in support of the bill that promotes a fair market for sungrown cannabis. Sungrown producers offer high-quality, sustainable products, and they deserve the same opportunities as indoor operations.

This bill helps level the playing field while supporting environmentally responsible farming. It's a smart, forward-thinking step for the future of cannabis.

Thank you for considering it.

LD1567 Example

I'm writing in support of the bill requiring clear labeling of cannabis products that have been treated with irradiation. Consumers have a right to know how their products are processed, especially when those methods may impact safety or quality.
