LD 104

Hello,

I am a tiny cultivator and caregiver and I am asking that you DO NOT PASS LD104 as it will be an expense that I simply can not afford and will put me out of business.

I have a wife and 2 small children that depend on me to provide for them and with margins already being slim, this added cost will destroy my business.

I have operated under the same business name in Maine since 2018 and my reputation matters to me. If a patient or storefront were ever unhappy with one of my products I would replace it or offer a refund. If the state were to offer free testing, I would gladly comply, but asking us tiny guys to bear this cost would be government destroying small business. Plain and simple.

Please protect small business and allow us small guys to focus on our passion and craft and cater to the patients that choose our brands and products time and time again.

God bless you.
