

Noah Lovley  
Corinna  
LD 104

My name is Noah Lovley I am a resident of Corinna Maine I am a medical patient/caregiver and I do not agree with the LD 104 act. I think that this makes absolutely no sense as the majority of items they call food on all of our grocery store shelves are filled with toxic chemicals and poisons that are causing autoimmune diseases, cancers, etc and the majority of those products super exceeds the mandatory testing limits if anyone of those products were to be tested 3rd party and still nothing is done about it and products are able to go on filled with heavy metals, PFA's, micro plastics, etc while the officials turn a blind eye to it all. As well as it has already been shown on multiple occasions by multiple different people that this testing you want to implement is not accurate whatsoever and is testing for things that are not even cannabis related. Thank you for your time and please vote to dismiss and opt out of LD 104.
