Windham  
LD 1620

I strongly support LD 1620 as this would help create a more reflective environment of organic products.

As an adult, I can buy cigarettes knowing they will kill me because the government makes the companies put labels on these goods that show they can kill me, now. Just do the same thing and if companies want to test so they can show customers and patients the results, then there will be people who buy that product because they feel safer. Let the free market decide. A consumer can walk into a store and ask for test results, if there are no results they are Not forced to buy the cannabis.

**LISTEN: IF THE STATE REALLY WANTS TO MAKE SOME MONEY**

Change the rules and start testing the "medical market" and free up Adult use of all regulations and you will see all the businesses in medical shift to Adult use which has a higher tax margin. Let adults make their own decisions like riding a motorcycle without a helmet and let it be.
