LD 1840 – Rein in OCP & Protect Caregivers

LD 1840 is critical to defending Maine's medical program. The Office of Cannabis Policy has repeatedly overstepped its authority—violating due process, removing protections for caregivers, and creating a hostile regulatory environment. This bill restores transparency, makes OCP's economic impact public, and eliminates the dangerous registry that puts caregiver homes and families at risk. It's a step toward accountability and sanity in our cannabis policy.
