

William Ralston
Portland
LD 1840

I support LD 1840 as it would allow the medical patients and caregivers to further build their relationships in an intimate and first hand way. Allowing farmer's markets for patients and caregivers to meet and see samples just like any other alcohol style event or gathering. If they can do it why can't the Maine Medical Cannabis program do the same, I would see it being 10 times more responsibly managed than any alcohol style market / event.

This would also further educate members of the medical program as advances to this industry continue to progress more and more, allowing Maine to continue to stand out as offering the best possible medicine to its' patients.
