

Ian Vann

LD 1620

I would support LD 1620, which raises the limit for adult use from 10,000 cfu/g to 100,000cfu/g because this is more attainable for outdoor growers as outdoor air has been tested as high as 50,000 cfu. I enjoy outdoor products and would see more of them if the test limit was 100,000. Please do not negatively effect the medicine of tons of people in the Maine medical program.
